DATASHEET
Model 150

MAKE TIME COUNT®

KEY FEATURES

Safe screen	Aluminium frame	EZ install	TimeEDGE Processor	PolarisMAX LEDs	Brightness Control	Memory Chip	Buzzer	Plug-in	IR Remote Control

SPECIFICATIONS

| SKU#	Numeral size	Digits	LEDs	Max viewing range	Weight	Power	Application	Warranty
150	5"	6	●	160 ft	6lbs	7.5W (5V/1.5A)	Indoor	1-Yr

DIMENSIONS

Figure A. Model 150, front view

Figure B. Model 150, rear view

KEY FUNCTIONS

✓ Displays time of day in hours, minutes & seconds (1 hours or military time)

✓ Coundown, count up, stopwatch, interval timing

✓ Infrared remote controlled

KEY BENEFITS

✓ 5″ numerals inbright red LEDs, easy to read up to 130ft

✓ High level of time accuracy

✓ Fast and easy installation and setup. Hangs like a picture frame

✓ Maintenance free

Performance packed

Framework
Aluminum alloy robust framework

Numerals
4", 6 digits, red LEDs

Screen
Acrylic safety screen

Processor
NanoTech TimeEdge processor

BTC®
Unique BigTimeClocks® branding

Remote control
Easy "on-the-fly" settings. Up to 40ft range

WHAT'S IN THE BOX?

1 x	**1 x**	**1 x**	**1 x**
Digital clock (with protective coating)	7ft power supply	Remote control	User᷉s guide
NOTES

- BigTimeClocks® **Model 150** is a plug-in clock and is supplied with a 9V/A (18W) power adapter featuring a 7ft long cord. To activate the display the clock must be plugged into either a 110V outlet (recommended for a permanent wall installations) or a portable battery if the clock is being used for an event or is being used in conjuction with a tripod. In this case the clock's power cord will plug into the portable battery's outlet (12V required).

- Model 150 features an internal memory that retains time settings in case of a power outage. Time will however not display on the screen until power resumes.

Added product value

- ✓ *Fast installation*
- ✓ *Easy to operate*
- ✓ *Robust, reliable & accurate*
- ✓ *Ultra bright highly legible LEDs*
- ✓ *1 year warranty*

CLOCK-iD,
CUSTOM CLOCKS by BIGTIMECLOCKS®

Clock-iD is a unique proposition by BigTimeClocks® offering custom clock solutions to meet any specification requirement. With Clock-iD, you CREATE, we DELIVER!

Clock-iD can either build a customer's established specification or assist in developing a whole new timing solution tailored to your application.

Integrating the most advanced technologies such as ethernet, wifi, GPS and radio data transmission, Clock-iD offers technically and financially optimized solutions for small spaces as well as larger multi-room facilities where content synchronizing might be required.
Clock-iD is not subject to minimum order quantities. With successfully completed projects ranging from 1.5"numerals to 48" numerals and beyond, there are no size limitations.
The sky is the limit!

To further explore Clock-iD options, our customer service team is available to analyze your project requirements and constraints and coordinate with our engineers and estimators to submit a quote within 24 hours.

Numeral size	Digits	LEDs	Max viewing range	Application	Warranty
On demand	On demand		up to 1,000ft	Indoor/Outdoor	1-Yr

"The perfect digital clock"

With vendors and distributors across the globe, implementing a reliable and durable time system was paramount to our success. Internal teams coordination and overseas meetings scheduled over multiple time zones were key drivers in updating our original analog time system which offered insufficient accuracy.

Upgrading to BigTimeClocks® digital timers set to atomic standards has positively impacted working behaviors, establishing record high productivity levels amongst coworkers.

On the production floor the custom clocks have proven to be invaluable. The clocks were tailored to the production manager's specifications and operate as per our exact requirements. Engaged in a major LEAN assessment, the factory has now identified key areas of improvement thanks to in depth timing data analysis.

The process optimizations and associated costs savings have led to an overall ROI of less than 2 weeks.
Very fast to install and easy to operate, we highly recommend BigTimeClocks® for any industrial and/or office space engaging in time waste management processes.
BigTimeClocks® sales and engineering teams guidance and expertise were key to the success of our project ultimately delivering a unique solution to support our business growth.

- Kevin J., Office Manager
