■ KEY FEATURES

■ SPECIFICATIONS

SKU#	Numeral size	Digits	LEDs	Max viewing range	Weight	Power	Application	Warranty
XL-96W	9"	6	●	280 ft	16lbs	24W (12V/2A)	Indoor/Outdoor	1-Yr

■ DIMENSIONS

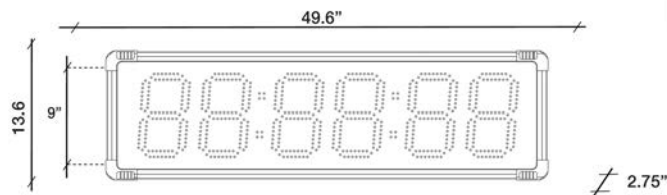

Figure A. Model XL-96W, front view

■ KEY FUNCTIONS

- ✓ Displays GPS/ atomic Time of day in 12 hours or military time (hours & minutes display)
- ✓ Countdown/ up in hours / minutes or minutes / seconds
- ✓ Stopwatch & interval timing (including master interval sequence automation)

■ KEY BENEFITS

- ✓ 9" numerals in bright red LEDs, easy to read up to 280ft
- ✓ Atomic time accuracy
- ✓ Fast and easy installation and setup.
- ✓ Maintenance free
- ✓ Radio remote control for an increased operating range

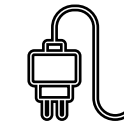

■ WHAT'S IN THE BOX?

1 x

IP65 waterproof digital clock (with protective coating)

1 x

7ft, 3-prong electrical lead

1 x

RF Remote control

1 x

User's guide

NOTES

- BigTimeClocks® **Model XL-96W** is a plug-in clock, that plugs directly into 110V and features a 7ft long waterproof cord.
- Model XL-96W features an internal memory that retains time settings in case of a power outage. Time will however not display on the screen until power resumes.

> 7 ft long, waterproof power cable

**+ Added value**

- ✓ *Fast installation*
- ✓ *Easy to operate*
- ✓ *Robust, reliable & accurate*
- ✓ *Ultra bright LEDs visible in all weather conditions*
- ✓ *1 year warranty*

**What does IP65 mean?**

Ingress protection rating (IP) grades the resistance of an enclosure against the intrusion of dust or liquids and is established as the standard for device waterproofing assessments in the electronics industry worldwide.

An IP rating is composed of two numerals:

- The first numeral refers to the protection against solid objects and is rated on a scale from 0 (no protection) to 6 (no ingress of dust).
- The second numeral rates the enclosure's protection against liquids and uses a scale from 0 (no protection) to 9

(high-pressure hot water from different angles).

An IP65 Rating means the product has the highest level of dust protection, and is able to "withstand low-pressure water jets from all directions" as per the international standard IEC 60529.

This definition means IP65 ratings withstand exposure to rain. An IP65 device can however not be submerged in water.

All BigTimeClocks® waterproof products are IP65 rated.

**“A fantastic motivational tool for athletes”**

Using a large waterproof outdoor digital clock for our track and field training needs has offered a lot of benefits for both our athletes and coaches as the timing element is crucial. Precision, consistency, and visibility are essential.

Whether there is rain, intense sunlight, or even dust, BigTimeClocks® model XL-96W remains functional and visible and operates under all temperature conditions. This allows us to maintain uninterrupted training schedules and immediate timing updates for spectators, athletes, and officials during competitions.

The clock's precise timing helps monitor progress and refine the athlete's performance. With a viewing range of approximately 300ft, the display is always visible to all participants, from the start of a sprint to the final moments of a long-distance run.

Athletes can monitor their own progress without needing constant input from a coach. In individual or group drills, athletes can take note of their lap times, sprints, or recovery periods independently. This makes training more efficient by allowing the coach to focus on giving personalized feedback rather than constantly providing updates on time.

Model XL-96W is a very versatile clock and a fantastic motivational tool for athletes. The automation features in master sequencing mode have definitely helped us improve our interval timing accuracy and the overall effectiveness of our workout routines.

Our return on our investment has been so substantial that we can only recommend BigTimeClocks® to anyone serious about taking their performance to the next level!

- Coach Gary, Head of Athletic Department
