6. Screw with plastic head x 2 pieces (Screw- A.B)
7. Short silver screw with wing nut A~2 pieces
8. Self-adhesive foam x 2 pieces
9. Installation instruction x 1 piece

### 2. SPECIFICATIONS

- Max Working Height: 1900mm
- Folded Height: 1200mm
- Net Weight: 3.5kg
- Load Weight: 10kg

### 3. INSTALLATION

**Step 1:** Open the tripod legs, extend the center pole and tighten the screw A in the adjusted working height.

**Step 2:** Connect the cross member with metal plate by two short silver screws, Lock the screw by wing nut, and fix them on the center pole with screw B.

**Step 3:** Adjust length of pole and lock in place using the locking bar placed through both holes in pole.

**Step 4:** Thread through the screw C or D in the screw hole of cross member according to the clock size. Lock the screw by applying the wing nut at the back of the cross member.

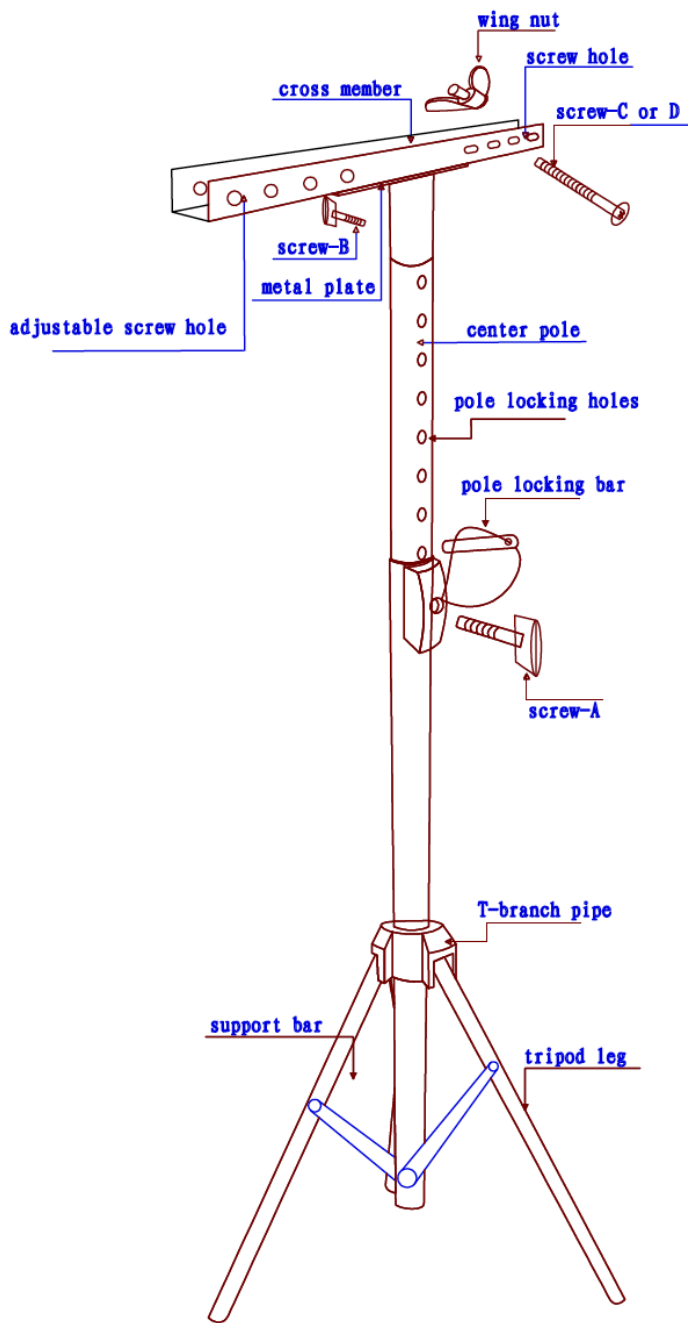

**Step 5:** Fix the self-adhesive foam to the back of the clock to make the clock 90° vertical to the ground while hanging.

**Step 6:** Hang the clock on the round head of screws using holes on the back of the clock.

Please note:

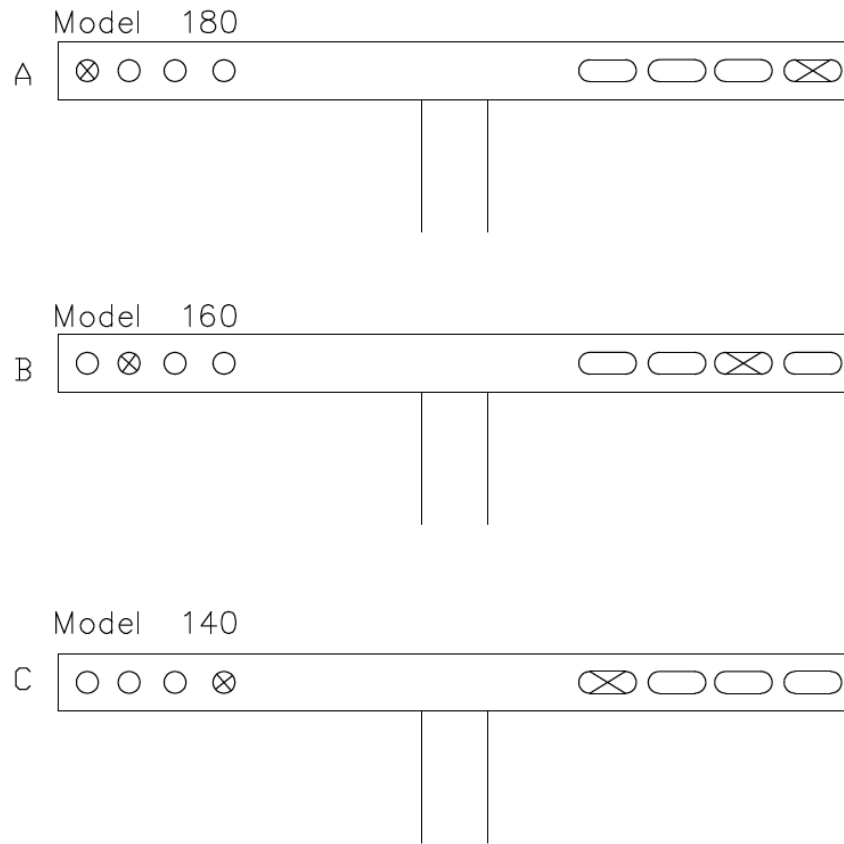

The small screw head C is for the smaller size clocks.

The big screw head D is for the biggest size clocks.

Max load: 10kg

## The application for screw holes

## The application for self-adhesive foam
